Lead Data Analyst | Business Intelligence | Power BI | SQL | Snowflake | Azure | ETL/ELT | Data Engineering

PROFESSIONAL SUMMARY

Lead Data Analyst with 12+ years of experience designing scalable Business Intelligence, analytics and cloud data solutions across healthcare, financial services and logistics. Expertise in Power BI, SQL, Snowflake, Azure data platforms and ETL/ELT pipelines, with extensive experience building analytical datasets, data models and automated reporting solutions. Proven ability to optimize data workflows, integrate enterprise data sources, improve reporting performance and deliver actionable insights that support strategic business decisions. Experienced collaborating with cross-functional stakeholders, mentoring analytical teams and delivering scalable data solutions in Agile environments.

KEY ACHIEVEMENTS

- Delivered 60+ enterprise dashboards across Power BI, SSRS and Excel supporting executive decision-making and operational reporting
- Automated 10+ reporting workflows, reducing manual effort by 40% and saving 150+ analyst hours annually
- Improved reporting performance by 30% through SQL query optimization, efficient data modelling and ETL enhancements
- Designed & optimized Snowflake data models, tables & views to support enterprise reporting & cloud-based analytics
- Developed cloud-based ETL/ELT pipelines using Snowflake, Azure and SQL, improving data availability and processing efficiency by 20%
- Supported business-critical operations across 40+ international airports spanning 6 global regions

PROFESSIONAL EXPERIENCE

ITECHBEES DIGITAL SOLUTIONS
LEAD DATA ANALYST
SENIOR ANALYST

HYDERABAD
April 2024 – Current
June 2022 – March 2024

- Developed & maintained 20+ Power BI dashboards for operations & KPI tracking, improving decision-making time by 20%
- Integrated data from Oracle ERP, SQL Server, Snowflake and multiple enterprise business applications to develop scalable analytical datasets, reducing reporting retrieval time by 30%
- Optimized SQL queries, Snowflake data models and ETL workflows, improving reporting performance and data processing efficiency by 20%
- Automated 10+ recurring reports, reducing manual effort by 40% and saving 12+ hours/month
- Designed reusable semantic models, KPI frameworks and analytical datasets to standardize enterprise reporting across multiple business functions
- Delivered insights and ad hoc analysis for senior stakeholders, supporting operational planning & performance improvement
- Designed and delivered enterprise analytics solutions using Snowflake, SQL and Power BI, enabling scalable reporting and improving data accessibility and analytical performance
- Developed ETL/ELT pipelines using SQL, Python and Azure to transform data from multiple enterprise systems
- Collaborated with data engineering, business and BI teams to design scalable cloud-based reporting solutions using Snowflake, Azure and Power BI
- Mentored junior analysts and supported delivery activities within the reporting team

MPHASIS PVT LTD
DELIVERY MODULE LEAD

CHENNAI
April 2021 - May 2022

- Developed and maintained 10+ Power BI dashboards to track system performance, incidents, and operational KPIs for business and operations teams
- Provided production support for a global airport operations system used across 40+ airports in 6 regions, maintaining 99%+ system availability and ensuring timely issue resolution within SLA timelines
- Analysed application and database data using SQL to troubleshoot 50+ production issues/month, improving resolution time and system reliability

- Developed SQL-based extraction and transformation processes supporting backend integrations, Azure-hosted reporting solutions and operational analytics
- Supported cloud-enabled application enhancements using SQL, Python and Azure data services, improving data availability and overall system performance
- Collaborated with stakeholders to define reporting requirements and improve KPI visibility across regions
- Participated in Agile delivery (sprint planning, sprint retrospectives, story estimation), contributing to prioritisation and timely sprint execution
- Coordinated with cross-functional teams to resolve issues and deliver enhancements within defined timelines
- Supported junior team members and contributed to task allocation and delivery tracking within the module

GROWSERVE E-SOLUTIONS PVT LTD
SENIOR DATA ANALYST
DATA ANALYST

CHENNAI
September 2019 – March 2021
April 2015 - August 2019

- Automated 10+ recurring Excel and SQL-based reports, reducing reporting time by 40% and saving 12+ hours/month
- Developed and maintained 15+ dashboards and reporting solutions to track sales, operations, and business KPIs
- Analysed datasets with 100K–500K records, identifying trends and supporting data-driven decision-making
- Designed centralized reporting datasets by integrating multiple enterprise data sources, improving reporting consistency and supporting scalable BI solutions
- Developed ETL workflows involving data extraction, transformation, cleansing and reconciliation to support enterprise reporting and business analytics
- Designed Excel-based reporting tools using Pivot Tables, VLOOKUP, and Power Query, improving reporting efficiency
- Supported business teams with ad hoc analysis and insights, enabling better operational and planning decisions
- Collaborated with stakeholders to refine reporting requirements and improve KPI tracking frameworks
- Contributed to process improvements that enhanced reporting turnaround time and reduced manual dependency

ACCENTURE PVT LTD
ASSOCIATE SOFTWARE ENGINEER

BANGALORE
November 2013 - March 2015

- Supported SharePoint 2010 to 2013 migration using DocAve, executing list-by-list migration across UAT and production
- Performed data validation using Excel (Pivot Tables, VLOOKUP, Power Query) to ensure migration accuracy & consistency
- Generated migration and validation reports using Excel and scripting support, improving tracking and auditability
- Assisted in scheduling and monitoring migration batches, ensuring smooth transition from UAT to production
- Provided L1, L2, L3 production support, resolving access issues, functional defects, and change requests within SLA timelines consistently
- Analysed system and data issues to identify root causes and support resolution across application and database layers
- Supported application enhancements and fixes using backend technologies including C# based on business requirements
- Collaborated with cross-functional teams to ensure system stability and smooth post-migration operations

SKILLS

- **Business Intelligence and Visualisation:** Power BI (DAX, Power Query), SSRS, Tableau, Excel (Advanced)
- **SQL and Databases:** SQL Server, Snowflake, Oracle, Advanced SQL, Window Functions, Stored Procedures, Query Optimisation, Performance Tuning
- **Cloud and Data Engineering:** Snowflake, Microsoft Azure, Azure Synapse Analytics, Azure Databricks, ETL/ELT Pipelines, SSIS, Data Warehousing, Data Modelling, Star Schema, Data Integration, Dimensional Modelling
- **Programming (Working Knowledge):** Python (Pandas, NumPy, Data Transformation, Automation)
- **Tools and Platforms:** Excel, Git, Jira, Version1, Oracle ERP
- **Concepts and Techniques:** KPI Reporting, MIS Reporting, Data Validation, Data Cleansing, Data Reconciliation
- **Methodologies:** Agile, Scrum, Waterfall

EDUCATION
