PROFESSIONAL SUMMARY

Senior BI/Data Analyst with 11+ years of experience across health, financial, and logistics domains. Skilled in building interactive dashboards with Power BI, optimising ETL pipelines in SQL, and applying Python for advanced analytics. Strong background in data visualisation, statistical modelling, and automation, with recent focus on NLP-driven analytics and GenAI applications embedded in BI platforms.

PROFESSIONAL EXPERIENCE

BUSINESS INTELLIGENCE ANALYST | Nexalytica Ltd | Glasgow, UK August 2022 - December 2025

- Gathered user requirements and documented 30+ user stories for an AI-driven BI platform.
- Created and maintained 6 structured training datasets for an NLP engine translating 500+ natural language queries into SQL.
- Developed Power BI dashboards integrated with the AI platform, reducing manual query generation by 70%.
- Collaborated with data engineers to optimise ETL pipelines feeding the AI models, reducing query response times by 25%.
- Partnered with data engineering teams to design scalable data pipelines on AWS (Spark, Redshift), improving BI dataset freshness and reducing dashboard query latency by 75%.

DELIVERY LEAD (LEAD ANALYST) | Mphasis Pvt Ltd | Chennai, India April 2021 - May 2022

- Created 30+ Power BI and SSRS reports for enhanced KPI tracking and operational insights.
- Optimised ETL pipelines and SQL data models for supply chain data, enhancing processing efficiency by up to 20%.
- Integrated Power BI with Oracle ERP and SQL Server, reducing data retrieval time by 30%.
- Managed Agile projects by creating storyboards, leading sprints, and assigning story points to ensure team alignment.

SALES ANALYST | Bharani Trading Company | Namakkal, India Nov 2017 - March 2021

- Analysed 150K+ sales records, uncovering sales trends to drive marketing and inventory decisions.

ASSOCIATE SOFTWARE ENGINEER | Accenture Pvt Ltd | Bangalore, India Nov 2013 - March 2015

- Coordinated data migration from SharePoint 2010 to 2013, resulting in successful project delivery and business impact.
- Developed SSIS jobs for ETL processes, improving data integration and reporting efficiency in the data warehouse.
- Delivered Excel-based reports using VLOOKUP and pivot tables for metadata tracking.

EDUCATION

MSc Data Analytics | University of Strathclyde | Glasgow 2022-2023

MSc Business and Management | University of Strathclyde | Glasgow 2016-2017

PROJECTS

- Scottish Power:** Led a data-driven project using LP model to optimise site selection and workforce planning for renewable energy facilities, projecting a 25% increase in efficiency and cost savings by 2030.
- NHS Scotland:** Conducted statistical analysis of 400,000+ emergency care records using R within NHS Safe Haven, integrating TRAC A&E and SMR01 datasets to evaluate unscheduled care outcomes, mortality, and hospitalisation risk using logistic regression, Cox, and Kaplan-Meier models.
- Experian:** Developed a data bot using Python to estimate gross income from net tax with 100% accuracy.
- Foresight Consultancy:** Developed LSTM models with 87.2% accuracy to predict gold prices, leveraging historical economic indicators to enhance forecasting precision.

SKILLS

- Business Intelligence & Reporting:** Power BI, DAX, MS SQL Server, Tableau, Looker, Excel (Advanced), Power Query, KPI Dashboards, Data Modelling, Semantic Models
- Data Analytics & Automation:** Python (Pandas, NumPy, Scikit-learn), R, Statistical Analysis, ETL, SSIS, SSAS, SSRS, Informatica
- Cloud & Data Platforms:** AWS (Redshift, EMR), BigQuery, GA4, Dynamics 365, SAS, Bash, SharePoint
- Certifications:** Microsoft Power BI Data Analyst Associate (PL-300), Microsoft Azure Data Fundamentals (DP-900)
